PROFILE SUMMARY

- **6+ years** of **Product Management** experience across **edtech** and **fintech**, with a **Computer Science** degree alongside an **MBA**, enabling execution from idea to shipped feature without waiting on engineering bandwidth.
- Twice promoted on merit: Management Trainee to Manager over 3.5 years at SBI Card, then Product Associate to Product Manager at ConveGenius, each step earned through delivery.
- Proven track record in structured experimentation and data-informed decision-making, including a **269% engagement lift** delivered through iterative A/B testing and personalization on a platform reaching 150M+ students.
- Expertise across the full product lifecycle: **requirement gathering**, **BRD/FSD/PDD documentation**, **PRD writing**, **roadmap definition**, **sprint planning**, and **cross-functional delivery**.
- Experience **directing cross-functional teams** of developers and testers, coordinating 11+ project deliveries that saved 600+ man-hours monthly in a regulated financial services environment.
- Hands-on builder outside the day job: conceived, built, and personally shipped four **live consumer products** solo, plus a **recognized system** for an **Indian Army** regiment.
- Strong **stakeholder management** and **communication skills**, translating between business, engineering, and design to keep delivery aligned to strategy.
- Early **hospitality industry** exposure: led a 700+ person intern network for OYO Rooms during MBA, generating GMV and channel sales for the organization.

CORE COMPETENCIES

Product: Product Strategy, Roadmapping, 0-to-1 Product Development, User Research, Product Vision, User Journey Mapping, Design Thinking

Execution: Agile & Scrum (JIRA), Sprint Planning, Wireframing (Whimsical, Mermaid), Prototyping (Lovable, Claude Design), Documentation (BRD/FSD/PDD), SIT / UAT

Leadership & Delivery: Cross-functional Collaboration, Stakeholder Management, Vendor Coordination, Digital Transformation, Process Optimization, Team Leadership, A/B Testing

Builder Toolkit: AI-assisted Development, Rapid Prototyping, End-to-end Delivery, Idea to Live Product, GSuite, Claude Code

PROFESSIONAL EXPERIENCE

Product Manager, CLMS, ConveGenius

Jul 2025 - Present

- **Own product** for **CLMS**, ConveGenius's content and learning management platform, centralizing content creation, tagging, translation, and distribution across client instances, including government education department partners.
- Defined the **platform's role-based access model** across five user types (Super Admin, Admin, Creator, Reviewer, Translator), enforcing a strict content-approval hierarchy
- **Drove requirements** for multilingual translation and localization workflows, supporting content distribution to downstream client systems via API, CSV, and JSON
- **Lead the platform's five core modules:** User Management, Content Management, Learning Management, Export Management, and Master Data Management.
- Set **target success metrics** for Assessment Creation ahead of launch: **80% flow-completion rate**, **sub-3-minute Quick Generate path**, **sub-8-minute manual build path**, and **zero support tickets requiring engineering intervention**.
- Targeting a **drop in assessment creation time** from **hours to under 5 minutes** for teachers non-technical content managers and curriculum leads.
- Run **rapid prototyping** and validation cycles to accelerate discovery and cut development overhead.

Product Manager, SwiftChat, ConveGenius

Apr 2024 - Jun 2025

- Promoted from Product Associate; owned product vision and roadmap for AI chatbots on **SwiftChat**, a conversational learning platform reaching 150M+ students nationwide.
- Defined product success metrics and introduced data tracking dashboards to drive data-informed decision-making.
- Improved engagement **269%** through iterative A/B testing, feature experimentation, and personalization initiatives.
- Partnered with design and engineering to translate insights into **intuitive user experiences** and **measurable business outcomes**.
- Implemented **rapid prototyping** and **validation cycles** to accelerate discovery and reduce development overhead.
- **Collaborated** with **content** and **partnerships** teams to launch scalable learning products for diverse audiences.

Product Associate, SwiftChat, ConveGenius

Dec 2022 - Mar 2024

- Assisted the **delivery** of over **25 learning and engagement products**, ensuring intuitive user experiences and seamless technical execution.

- Designed **improved onboarding** and **conversation flows**, **reducing user drop-offs** and enhancing retention.
- Vibe-coded internal tools to **improve monitoring**, **content processing**, and **operational reliability**.
- Coordinated with cross-functional teams to define priorities, maintain documentation, and oversee timely releases.

AI Project Management (Management Trainee → Assistant Manager → Manager), SBI Card *May 2019 - Dec 2022*

- Progressively promoted through three roles over 3.5 years, managing and delivering conversational AI projects across business functions.
- Led **project planning** sessions with stakeholders across IT, Marketing, and Customer Service, and directed a **cross-functional team** of developers and testers across **11+ project deliveries**.
- Enabled an **80% increase** in user logins via a chatbot channel, and reduced **600+ man-hours monthly** on a customer support chatbot channel.
- **Designed project architecture** using **flowcharts**, **UML diagrams**, and **HTML prototypes**, ensuring technical clarity for implementation partners.
- Coordinated **API framework integration** using SOAP UI, and managed SIT/UAT cycles via ALM for quality assurance.
- Oversaw **project documentation**, **stakeholder communication**, and vendor coordination to ensure alignment and timely execution.
- Conducted project reviews and published reports on application feature usage for senior management, informing prioritization decisions.
- Drove process improvement initiatives that enhanced delivery efficiency and cross-team collaboration.
- Awarded **Champion of the Quarter (2021)** for exceptional innovation and organizational impact.

INTERNSHIPS

OYO Campus Commander → Channel Sales & Marketing Intern, OYO Rooms, Gurgaon *Nov 2017 - Jun 2018*

- Onboarded colleges and corporates through OYO events, and managed **700+ OYO Campus Crew interns**, guiding them to hit targets and generate GMV for the organization.
- Built motivational strategies and improved training methodology for a distributed intern community, developing a smoother, more efficient skills development program.
- Generated channel sales through the assigned Campus Crew, and grew an active on-campus community of marketing enthusiasts promoting OYO Rooms at campus events.

INDEPENDENT PRODUCT BUILDS

Shipped fast with AI-assisted development: placed in the top 1% globally for code shipped on Lovable in 2025. Selected builds below; full portfolio with live links at the URL above.

VARMS, Visitor and Resource Management System (Volunteer)

- Volunteered to lead a remote team through a two-weekend sprint to conceive, build, and deploy a tailored database system for the 330 Field Regiment, Indian Army, streamlining administrative and HRMS workflows for the regiment. Received an official Letter of Appreciation from the Commanding Officer for the end-to-end product management and development.

Yanks TCG, Live Sale Platform

- Built a real-time marketplace for a Pokemon card collector community: live inventory across singles, graded slabs, sealed product, and accessories, plus live bidding and numbered-slot box breaks, shipped solo from scratch for an active WhatsApp community.

Yanks Diecast, Live Sale Platform

- Extended the same core system into a second product line for diecast car collectors, with faceted search, dynamic pricing, stock tracking, and a claim-based checkout flow across dozens of live SKUs.

Math Tug-of-War, Classroom Game

- Designed and built an EdTech game for classroom touchscreen TVs, applying day-job instincts to a self-directed product: five difficulty tiers, timed rounds, and a streak-based game mechanic.

Krishna Kunj Stays, Room Service Ordering Tool

- Replaced manual phone and WhatsApp ordering at a homestay with a two-minute self-serve flow: room-based menu, cart with cooking instructions, and automatic WhatsApp order handoff to the kitchen.

EDUCATION

PGDM, International Business (Marketing), Birla Institute of Management Technology, Noida | 2017-2019

B.Tech, Computer Science & Engineering (Specialization in Cloud-based Application Development), DIT University, Dehradun | 2013-2017
