

YUKTARTH NAGAR

Product Manager, 0-to-1 builder, targeting AI-native and technical Product Manager roles

Dehradun, India | +91 8630541069 | yuktarthnagar@gmail.com

yuktarthnagar.com • linkedin.yuktarthnagar.com

PROFILE SUMMARY

- 6+ years in Product Management across edtech and fintech, backed by a Computer Science degree and an MBA. Twice promoted on merit, most recently to Product Manager at ConveGenius.
- Delivered an **89% engagement lift** across **15M+ students** via A/B testing and personalization; drove an **80% login increase** and **600+ monthly hours saved** at SBI Card.
- Hands-on builder: shipped four live consumer products solo, plus a volunteer system for an Indian Army regiment that earned a Letter of Appreciation.
- Early hospitality exposure: onboarded colleges and corporates for OYO Rooms, driving GMV and channel sales, during an MBA internship.

AWARDS & RECOGNITION

- Letter of Appreciation, Commanding Officer, 330 Field Regiment (Indian Army)**, for end-to-end product management and development of VARMS.

CORE COMPETENCIES

Product: Product Strategy, Roadmapping, 0-to-1 Product Development, User Research, Product Vision, User Journey Mapping, Design Thinking

Execution: Agile & Scrum (JIRA), Sprint Planning, Wireframing (Whimsical, Mermaid), Prototyping (Lovable, Claude Design), Documentation (BRD/FSD/PDD), SIT / UAT

Leadership & Delivery: Cross-functional Collaboration, Stakeholder Management, Vendor Coordination, PRD & Requirements Writing, Process Optimization, Team Leadership, A/B Testing

Builder Toolkit: AI Pair-Programming (Lovable, Claude Code), Rapid Prototyping, End-to-end Delivery, Idea to Live Product, GSuite

PROFESSIONAL EXPERIENCE

Product Manager, ConveGenius

Apr 2024 - Present

- CLMS (Jul 2025-Present):** Lead CLMS, ConveGenius's content and learning management platform, unifying content creation, translation, and distribution across client instances, including government education partners.
- Defined a role-based access model across five user types (Super Admin, Admin, Creator, Reviewer, Translator), enforcing a strict content-approval hierarchy from creation to publish.
- Drove requirements for multilingual translation and localization workflows, enabling content distribution to downstream client systems via API, CSV, and JSON exports.
- Took Assessment Creation from an unvalidated prototype to a production-ready feature, writing a 13-section PRD covering UX, edge cases, and acceptance criteria.
- At launch, achieved **80% flow-completion rate**, **sub-3-minute** Quick Generate path, **sub-8-minute** manual build path, and **zero support tickets** requiring engineering intervention.
- Reduced assessment creation time from hours to under 5 minutes for teachers, non-technical content managers, and curriculum leads.
- SwiftChat (Apr 2024-Jun 2025):** Promoted from Product Associate to lead vision and roadmap for SwiftChat, ConveGenius's AI chatbot platform for education, reaching **15M+ students** nationwide.
- Improved engagement on SwiftChat by **89%** through iterative A/B testing, feature experimentation, and personalization, tracked via dashboards I introduced for data-informed decisions.
- Partnered with design and engineering to turn user insights into shipped features across SwiftChat's chatbot experience.
- Collaborated with content and partnerships teams to launch scalable learning products for diverse student audiences.

Product Associate, SwiftChat, ConveGenius

Dec 2022 - Mar 2024

- Delivered **25+ learning and engagement products** with intuitive user experiences and seamless technical execution.
- Redesigned onboarding and conversation flows, reducing user drop-offs and improving retention.
- Developed two Python utilities: an image-to-text converter and a real-time API uptime checker that caught third-party failures before they caused outages.
- Personally coded the **first SwiftChat bot with 3D model integration** (Periodic Table Bot) using AI-assisted development, taking engineering load off the tech team.
- Drove **31-89% year-over-year engagement gains** across five engagement bots by shipping persistent menus, cross-bot discovery, and scorecards.

AI Project Management (Management Trainee → Assistant Manager → Manager), SBI Card *May 2019 - Dec 2022*

- Progressively promoted through three roles over 3.5 years, managing and delivering conversational AI projects across business functions.
- Led project planning sessions with stakeholders across IT, Marketing, and Customer Service, directing a cross-functional team of developers and testers across **11+ project deliveries**.
- Enabled an **80% increase** in user logins via a chatbot channel and reduced **600+ man-hours monthly** on a customer support chatbot channel.
- Designed project architecture (flowcharts, UML, HTML prototypes) and coordinated API integration via SOAP UI, managing SIT/UAT cycles through ALM.
- Conducted project reviews and published feature-usage reports for senior management, informing prioritization decisions.
- As Management Trainee: shipped chatbot marketing campaigns reviewed by the CIO, simplified the credit-limit-increase process via CRM flow charts, and flagged a Wi-Fi vulnerability that could have exposed confidential data.

INTERNSHIPS

Channel Sales & Marketing Intern, OYO Rooms, Gurgaon

Nov 2017 - Jun 2018

- Onboarded colleges and corporates through OYO events, driving GMV and channel sales through the network.

INDEPENDENT PRODUCT BUILDS

Shipped fast with AI pair-programming, placing **top 1% globally** for code shipped on Lovable in 2025. Full portfolio with live links at the URL above.

Yanks TCG, Live Sale Platform

- Shipped a real-time marketplace for a Pokemon card collector's WhatsApp community: live inventory (singles, graded slabs, sealed product), bidding, and numbered-slot box breaks, built solo from scratch.

Yanks Diecast, Live Sale Platform

- Extended the same core system into a second product line for diecast collectors: faceted search, dynamic pricing, stock tracking, and claim-based checkout across dozens of live SKUs.

Math Tug-of-War, Classroom Game

- Designed an EdTech game for classroom touchscreen TVs, applying day-job instincts to a self-directed product: five difficulty tiers, timed rounds, and a streak-based mechanic.

Krishna Kunj Stays, Room Service Ordering Tool

- Replaced manual phone and WhatsApp ordering at a homestay with a two-minute self-serve flow: room-based menu, cart notes, and automatic WhatsApp handoff to the kitchen.

VARMS, Visitor and Resource Management System (Volunteer)

- Led a remote team through a two-weekend sprint to build and deploy a database system for the 330 Field Regiment, Indian Army, streamlining administrative and HRMS workflows (see Awards & Recognition).

EDUCATION

PGDM, International Business (Marketing), Birla Institute of Management Technology, Noida | 2017-2019

B.Tech, Computer Science & Engineering (Specialization in Cloud-based Application Development), DIT University, Dehradun | 2013-2017
